

Tripe is a type of edible offal made from the stomach of various domestic animals. Beef tripe is typically made from the first three of a cow's four stomachs, the rumen (blanket/flat/smooth tripe), the reticulum (honeycomb and pocket tripe), and the omasum (book/bible/leaf tripe). Abomasum (reed) tripe is also seen, but with much less frequency, owing to its glandular tissue content. Sheep and pork tripe are also produced.
