Create a New Project.

Start to think of an easy project, which you may likely use, according to your needs. If you are a stude

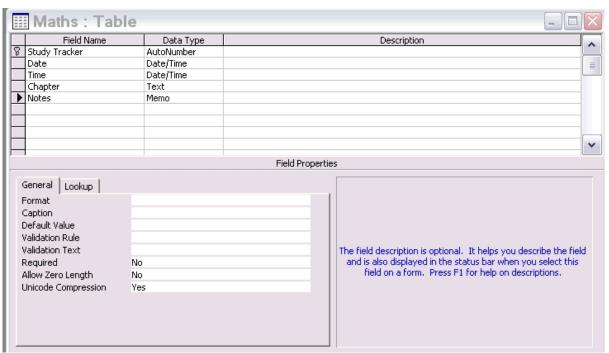

Let us take a Student:

To keep his plans in front of him, he should think of what is upper most in his mind. Let us say, that M

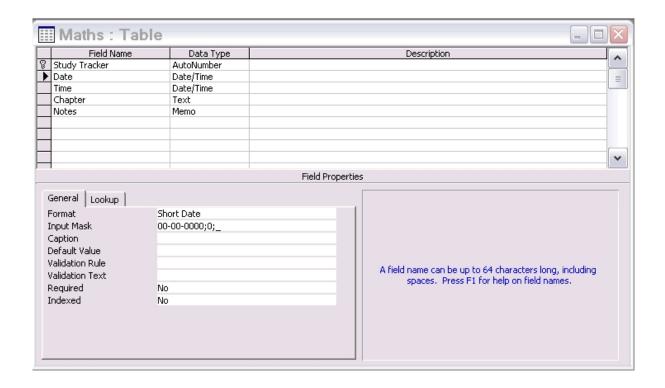

He would like to have his records have the following fields:

Autonumber. Date, Time, Chapter, Notes (Data Type Memo allows you to store unlimited data, but of

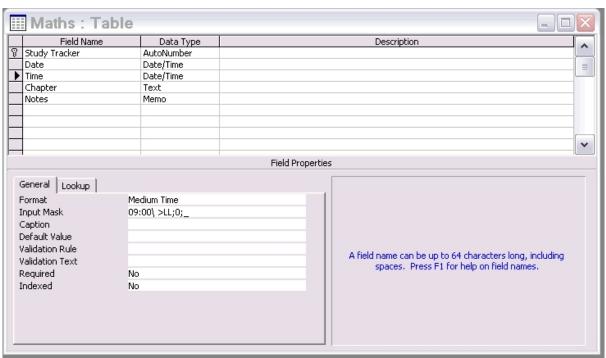

Project: Design a table with the above fields and name it Mathematics Table.

Data Types, Date, can have an input mask, a date format. Note the character of the mask and format.

Time too can have an input mask. On the extreme right of the Property Window on the Ge

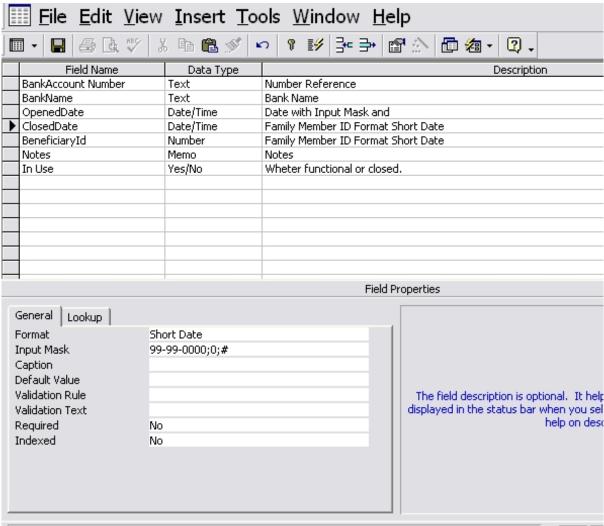

Input Masks are a means by which, only the data that is expected will be input by the operator.,

You can study from the samples in Microsoft Access.

Choose the second option, Access database wizards, pages, and projects and select any and study h

Home Accounts Tables.

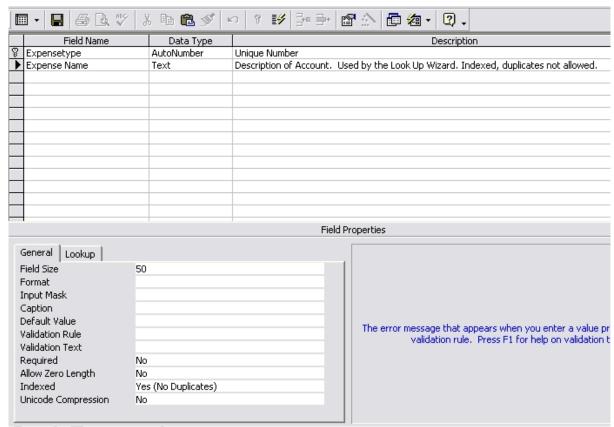

Family Members - linked table.

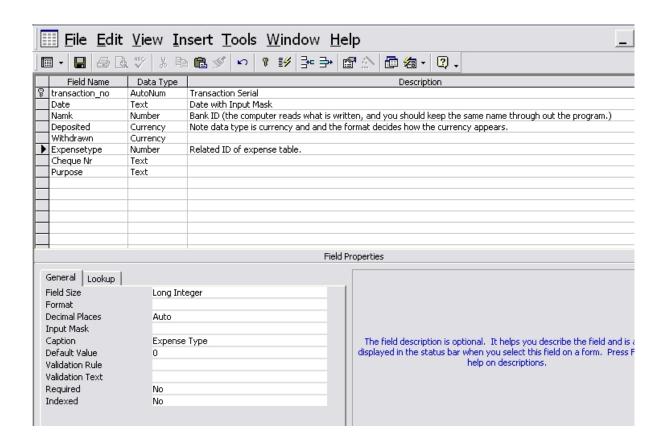

Note that the Beneficiary ID is unique as it is the Primary Key and is linked in the previous table as Be

Expense Types - Linked table.

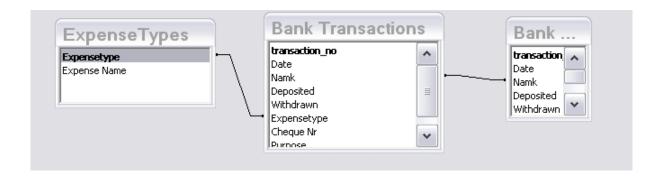

Bank Transactions.

Note that I have made a spelling mistake in the Bank Name, and it is Namk instead of Bank. It does it

Relationships

These are one to one.

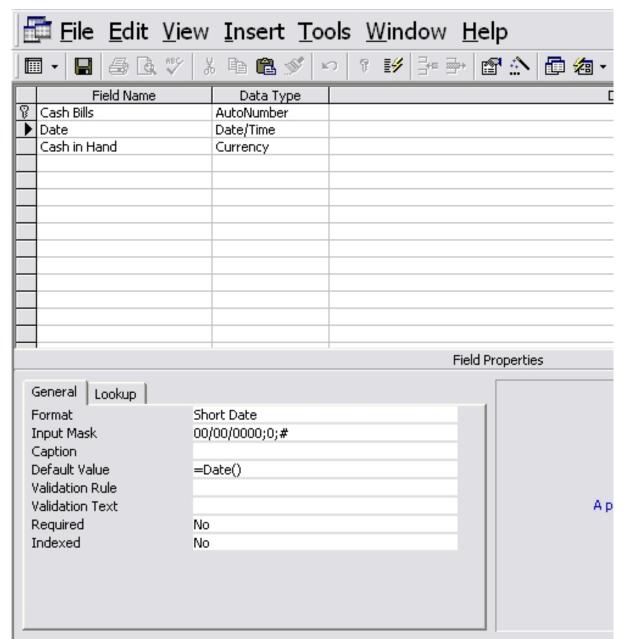

These tables will be used by using a technique called Form / Subform Input. This will be explained in a

Daily Cash Purchases.

We will make a sub program module, to monitor our cash purchases from the market or retail shops a

We sill then transfer the day's expenses into the Cash and Bank register, under the cash account.

Tables.

Note in the Date field the properties of Format, Input Mask and Default Value. Default value gives the

Cash in hand is the cash we hold at the beginning of each day. The other information comes in the Fo

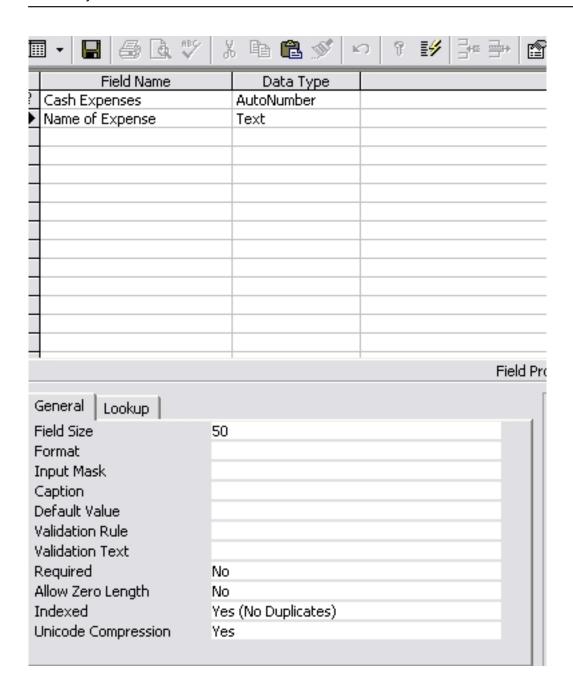

Now we have to create two other trebles, one for the types of expenses we incur in cash purchases, a

Expense List.

Data View appearance of the List

		Cash Expenses	Name of Expense
▶	+	i	Rice
	+	2	Fish
	+	3	Meat
	+	4	Vegetables
	+	5	Cloth
	+	6	Cable TV
	+	7	Newspaper
*		(AutoNumber)	

Design View

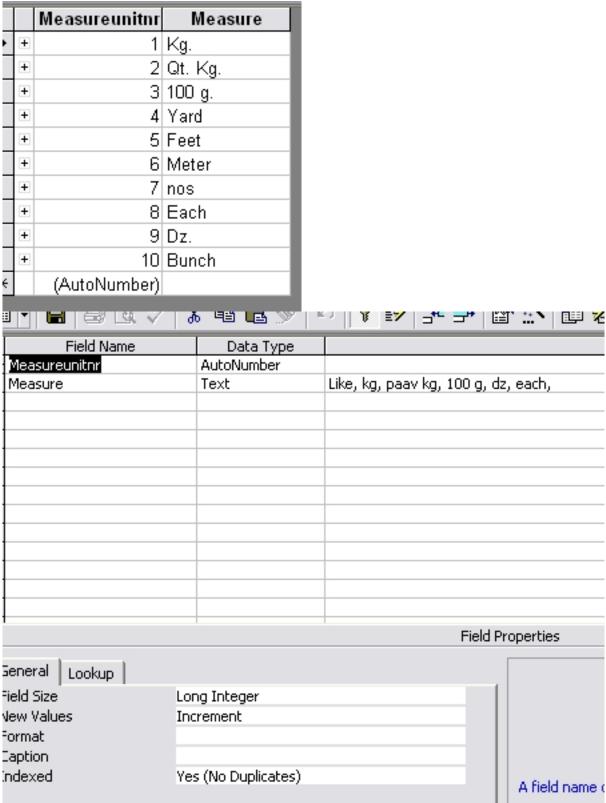

Note the text name of the expense should not inadvertently be repeated, so we make it indexed with N

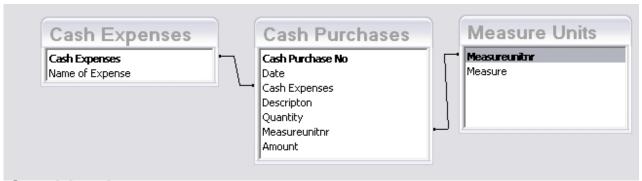

Cash Transactions Table.
